

Appliance Repair Cost Guide: London Ontario 2026

maxappliancerepairlondon.ca | London, Ontario

What does a service call cost?

Most London ON companies charge \$80 to \$120 for a diagnostic service call. This is usually applied toward the repair.

Repair cost ranges by appliance

Refrigerator: \$150 to \$400

Washing machine: \$130 to \$380

Dryer: \$100 to \$300

Dishwasher: \$120 to \$350

Oven / stove: \$120 to \$370

Sealed-system fridge repairs (compressor, refrigerant): \$400 to \$700

What affects the bill

1. The part cost itself (premium brands cost more)
2. Age and parts availability
3. Model complexity (smart appliances, inverter motors)

How to get a fair price

- Get a written estimate before authorizing work
- Ask if the diagnostic fee applies toward repair
- Ask about the parts vs. labour split
- Confirm whether the repair comes with a warranty

The 50 percent rule

If the repair costs more than 50% of a comparable new appliance, consider replacing.
