

Used Appliance Buyer's Checklist (London, Ontario)

Max Appliance Repair London - Homeowner Guide 2026

Before You Buy: Verify the Basics

1 Get the model number and age

Look up the manufacture year and any recall history.

2 Confirm it is under half its lifespan

Most fridges, washers, dryers last 10 to 15 years.

3 Check the price gap

Aim for 40 to 60 percent below the new price to make it worth it.

4 Insist on a live test

If you cannot run it before paying, walk away.

On-Site Inspection

1 Feel the cold, hear the hum

A fridge should be cold and quiet within minutes.

2 Run a short washer cycle

Watch it fill, agitate, and drain without leaks.

3 Check seals, rust, and cosmetics

Torn gaskets and cracked glass are hidden costs.

4 Ask about warranty

Dealer units often carry limited coverage; private sales rarely do.
